

TECHNICAL ROLE · FULL-TIME

Electronics Technician / Engineer (m/w/d)

Technology that makes a difference at the nanometer scale.

At SONOSYS®, we focus on high-frequency ultrasonic systems, known as Megasound. These systems are used in high-tech fields such as semiconductor manufacturing and other micro- and nanostructures to remove the smallest particles, down to the nanometer scale.

As a pioneer in this field, the medium-sized company has been providing solutions since 1995 and supplies customers worldwide. These industries are driven by strong innovation and have been in the public spotlight in the recent years due, among other things, to the widely discussed “chip shortage”. The growing demand is leading to substantial investments by semiconductor manufacturers — investments from which we, as a specialised supplier, also benefit.

Our growth is driven by qualified, committed employees and an open, friendly working culture. Our innovative technical solutions are developed and manufactured at our site in Neuenbürg in Germany’s northern Black Forest, and distributed worldwide.

Since 1995 Pioneer in Megasound	Worldwide Technology in use	Neuenbürg Development & Manufacturing

To strengthen our team, we are looking for an

Electronics Technician / Engineer (m/w/d)

YOUR CONTRIBUTION

What you will do

Your responsibilities:

- Assembly of electronic and mechanic modules and devices
- Commissioning and final testing of completed ultrasonic components
- Firmware / embedded programming in R&D
- Documentation
- Incoming goods inspection

What you bring:

- Completed formation as an electronics technician for devices and systems, industrial electronics technician, mechatronics technician, embedded systems specialist, or comparable qualification
- Experience in analog circuit, ideally with power electronics
- Programming skills in firmware / embedded systems
- Proficiency in common Windows Office applications
- Fluency in German and English, both written and spoken
- Ability to work independently

YOUR NEXT STEP

A long-term perspective. Future-ready products.

At SONOSYS, you can expect friendly colleagues and a varied range of responsibilities. We offer a long-term perspective with future-ready products in a growing market within the high-tech sector.

We look forward to receiving your application

Please apply by email, including your salary expectations and earliest possible start date, to:
